

Minecraft TikTok Live Commands

How to Use These Commands:

To activate TikTok-to-Minecraft interaction, you need:

- The TikTok Live Connector mod (<https://www.curseforge.com/minecraft/mc-mods/tiktok-live-connector>).
- An empty text file named `Commands.txt` on your Desktop.
- Use the **smoogames Editor Tool** from smoogames.com to assign TikTok gifts/triggers to specific command blocks.

Each command uses the placeholder `{username}` to dynamically insert the viewer's TikTok name.

Basic Commands

Creeper Attack

Usage Tips

- {username} automatically gets replaced by the viewer's TikTok username
- Target selectors: @p (nearest), @r (random), @a (all)
- Recommended command order: Sound → Message → Action
- These commands can be combined with mods and resource packs
- Advanced commands can be generated using AI tools like ChatGPT
